

Phoseon Technology Presents UV LED Curing Solutions for Digital Printing at IMI European Ink Jet Conference

Attend the Ink Jet Academy to learn more about the uses of pinning to control image quality

Hillsboro, Oregon (October 27, 2014) Attendees at IMI Europe will get to see the latest UV LED curing solutions specifically targeted for the digital ink jet market. Phoseon's UV curing products come in a wide variety of sizes to match application needs, in both water-cooled and ambient air-cooled solutions. Phoseon has partnered with various inkjet printer suppliers, OEMs and customers to provide the market with leading edge products.

UV LED Light Source for inkjet Pinning

Rob Karsten, Director of Sales and Marketing - EMEA, will also give a presentation at the Improving Image Quality Seminar on how to implement pinning to control image quality. The pinning process is used to 'freeze' ink drops before overlaying other colors or doing a full cure. Attend the Phoseon presentation to learn more about ink jet pinning applications and visit the Phoseon exhibit to see new and exciting UV LED curing products.

IMI Europe's European Ink Jet Conference 2014 will provide an outstanding program packed with the latest overviews, updates and technology developments. The Conference takes place November 5-7 in Barcelona, Spain.

While bringing the three-tiered benefits of UV LED curing (advanced capabilities, operating economics, and environmental advantages), Phoseon's products add additional capability with superior performance, integrated control, and outstanding reliability for customer's tough curing environments.

About Phoseon Technology

Phoseon Technology is the world leader in providing UV LED solutions for commercial and industrial applications. Phoseon's products deliver maximum UV energy, high performance, and real-world reliability for UV LED curing of adhesives, coatings and inks. The Company provides worldwide sales and support capabilities and can be reached at www.phoseon.com.
