Phoseon Technology Displays UV LED Curing Solutions at InPrint 2016 *Stop by the Phoseon stand A48 to see new LED curing products for industrial printing*

Hillsboro, Oregon (October 10, 2016) - The Phoseon exhibit will display a wide array of exciting LED curing products for industrial printing applications at the upcoming InPrint Show in Hannover, Germany November 15-17. Phoseon's extensive portfolio of LED curing products come in both ambient air-cooled and water-cooled solutions. Phoseon's unique scaling feature allows units to be stacked 'end to end' with contiguous, uniform UV output to fit any application size.

New FireEdge™ FE400

Stop by the stand to learn more about Phoseon's new FireEdge™ FE400 LED curing products for both full-cure and pinning applications. The new small form factor air-cooled products deliver 8W/cm² peak intensity and come equipped with Phoseon's new TargetCure™ technology that delivers precise, stable and consistent curing. It also comes with patented WhisperCool™ technology that offers a low noise solution with increased UV output. These are the first of several new technologies Phoseon is bringing to the market in 2016 to improve customer's capabilities.

The FireLine™ FL400 LED curing solution is Phoseon's highest power water-cooled light array with peak irradiance up to 20W/cm². The solution is scalable to support custom length options, and offers exceptional optical uniformity for consistent and reliable curing for the most demanding industrial printing applications.

InPrint features a comprehensive range of technologies and methods for printing on diverse materials such as metal, plastics, foils, textiles, glass, ceramics, wood and other substrates used within industrial manufacturing. As such, it provides a unique specialist platform for industry professionals seeking new opportunities for the use of specialty, screen, digital, inkjet and 3D printing.

About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications. As the world leader in UV LED curing, Phoseon provides patented LED technology to deliver rugged, high-performance products for application specific solutions. The Company is focused 100% on LED technology and provides worldwide sales and support capabilities.
