

Converters Expo 2017

Press Release

Phoseon Technology Exhibits LED Curing Solutions at Converters Expo 2017

Visit the Phoseon booth to learn more about LED curing for printing applications

Hillsboro, Oregon (February 28, 2017) - Phoseon will showcase the latest UV LED curing solutions for printing applications at the upcoming Converters Expo 2017 event in Green Bay, WI. Visit the Phoseon exhibit, booth number 45, to learn how Phoseon LED technology is a perfect fit for printing applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials (including thin and heat-sensitive substrates) at maximum production speeds with low-input power.

Phoseon LED Flexo Solution

Converters Expo 2017 will take place March 22-23, 2017 at the Lambeau Field Atrium in Green Bay, WI. It will showcase a wide variety of printing related equipment for label, screen and inkjet printers, manufacturing machinery, drying and curing equipment associated with this sector.

About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
