Press Release

Phoseon Technology Exhibits LED Curing Solutions at Smart Materials 2017

Visit the Phoseon booth to learn more about LED curing for adhesive applications

Hillsboro, Oregon (March 2, 2017) - Phoseon will showcase the latest UV LED curing solutions for adhesive applications at the upcoming Smart Materials 2017 event in Bangkok, Thailand. Visit the Phoseon exhibit to learn how Phoseon LED technology is a perfect fit for adhesive applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials (including thin and heat-sensitive substrates) at maximum production speeds with low-input power.

Smart Materials 2017 will take place March 16-18 in Bangkok, Thailand. It will showcase a wide variety of materials science and technology for label, screen and inkjet printers, manufacturing machinery, drying and curing equipment.

About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
