## Press Release

### Phoseon Technology to Discuss LED Curing Solutions at the AWFS Fair 2017

*Attend the fair to learn more about LED curing for coating applications*

Hillsboro, Oregon (June 20, 2017) - Phoseon Sales Manager, David Kim, will discuss the latest UV LED curing solutions for coating applications at the upcoming AWFS Fair 2017 in Las Vegas, NV. Come hear Mr. Kim to learn how Phoseon LED technology is a perfect fit for coating applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

On Thursday, July 20<sup>th</sup>, Mr. Kim will share his expertise in a panel discussion for the Latest Advancements in the UV Finishing Technology - LED & Beyond. The session will feature information about the cutting edge UV LED technology, the keys to maintaining your process window and profitability, how to implement UV technology, and the difference between the UV technologies on the market. "UV LED curing solutions are being rapidly adopted for wood applications," says Mr. Kim. "Low operating costs, long lifetime, and low maintenance are just a few of the reasons that UV curing is ideal for wood coating. Our products can scale to cover any conveyor width and the consistent UV output enables end users to run their production lines at maximum speeds."

AWFS Fair 2017 will take place July 19-22 at the Las Vegas Convention Center in Las Vegas, NV. It will showcase a wide variety of industry-related equipment for label, screen and inkjet printers, manufacturing machinery, drying and curing equipment associated with this sector.

#### About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
