Press Release

Phoseon Technology Brings UV LED Curing Solutions to LOPEC 2019

*Visit the Phoseon booth (402) to learn more about
LED curing for printed electronics*

Hillsboro, Oregon (March 6, 2019) - Phoseon will showcase the latest UV LED curing solutions for printed electronics at the upcoming Large-area, Organic & Printed Electronics Convention (LOPEC) 2019 Conference in Munich, Germany. At booth number 402, Phoseon will exhibit a full range of air-cooled light sources for screen- and inkjet-printed electronics and electronics coatings applications.

Phoseon offers the widest UV output power in the industry. When maximum dose and dwell time are critical for printed electronics applications, the FireJet™ FJ240, with its wide exposure window, is an ideal solution. Packed with features that include support for Phoseon's WhisperCool™ and TargetCure™ technology, the FJ240 provides reliable and consistent performance at a quiet operating level.

TargetCure allows for meeting the tightest process specifications and eliminates thermal impacts such as environmental temperature shifts, warm up effects and power decreases over life time.

WhisperCool technology provides powerful, quiet, and safe curing: a quieter solution with high UV output and small form factor.

FireJet™ FJ800
LED Light Source

For large area curing applications, such as in OLED or display manufacturing, Phoseon will display the scalable air-cooled FJ800 light source.

LOPEC is the leading trade fair for the printed electronics industry. The event will take place at Messe München on 20-21 March in Munich, Germany. The event showcases current trends, presents innovative products, highlights new market opportunities for the electronics industry and helps foster the development of new materials, manufacturing technologies and applications.

About Phoseon Technology

Since 2002, Phoseon Technology pioneered the use of LED technology for Life Sciences and Industrial Curing. Through our relentless innovation, we deliver high performance, reliable and patented LED based solutions. Our strong focus on customer collaboration has resulted in world-wide market leadership position and presence. Phoseon is an ISO9001 certified company manufacturing award winning products that are covered by more than 300 patents worldwide. We uniquely focus 100% on LED technology therefore ensuring superior reliability, business economics, and environmental benefits.
