Phoseon Technology Exhibits LED Curing Solutions at the FTA INFOFLEX 2019

*Visit the Phoseon exhibit, Booth 204, to learn more about LED curing for
flexographic printing applications*

Hillsboro, Oregon (April 22, 2019) - Phoseon will showcase the latest UV LED curing solutions for flexographic printing applications at the upcoming FTA INFOFLEX 2019 event in New Orleans. Visit the Phoseon exhibit, booth 204, to learn how Phoseon LED technology is a perfect fit for flexographic

*FireJet™ FJ605 UV LED air-cooled
curing solution for flexographic presses*

applications due to the ease of integration and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

The FJ605, a self-contained air-cooled UV LED curing lamp for flexographic applications, delivers substantial curing energy with an advanced digital control interface and is available in lamp lengths that cover the gamut of narrow and mid-web presses.

The FTA INFOFLEX 2019 will take place at the Ernest N. Morial Convention Center on May 6-11 New Orleans, LA. It will showcase a wide variety of industry-related equipment for label, screen and inkjet printers, manufacturing machinery, drying and curing equipment associated with this sector.

About Phoseon Technology

Since 2002, Phoseon Technology pioneered the use of LED technology for Life Sciences and Industrial Curing. Through our relentless innovation, we deliver high performance, reliable and patented LED based solutions. Our strong focus on customer collaboration has resulted in world-wide market leadership position and presence. Phoseon is an ISO9001 certified company manufacturing award winning products that are covered by more than 300 patents worldwide. We uniquely focus 100% on LED technology therefore ensuring superior reliability, business economics, and environmental benefits.
