

# Coating and Laminating Congress 2017

## Press Release

### Phoseon Technology Exhibits LED Curing Solutions at the Coating and Laminating Congress 2017

*Visit the Phoseon exhibit to learn more about LED curing for coating applications*

Hillsboro, Oregon (September 6, 2017) - Phoseon will showcase the latest UV LED curing solutions for coating applications at the upcoming Coating and Laminating Congress 2017 event in Ghent, Belgium. Visit the Phoseon exhibit to learn how Phoseon LED technology is a perfect fit for coating applications due to the compact size, ease of integration, and high intensity output achieved through optimized LED thermal management. Users of Phoseon LED curing systems can process a variety of materials, including thin and heat-sensitive substrates, at maximum production speeds with low-input power.

Coating and Laminating Congress 2017 will take place September 28-29 at 3Square Business Center in Ghent, Belgium. It will showcase a wide variety of industry-related equipment for the curing of coating and adhesive materials, manufacturing machinery and drying equipment associated with this sector.

#### About Phoseon Technology

In 2002, Phoseon Technology pioneered the use of LED technology for UV curing applications, and has recently expanded into Life Sciences. As the world leader in providing UV LED solutions, Phoseon engineers patented LED technology to deliver rugged, high-performance products for application specific needs. The company is focused 100% on LED technology and provides worldwide sales and support capabilities.
